Project Description

One of the many worldwide Flight Training Centres operated by FlightSafety International is located at Farnborough Airport, Hampshire in the UK.

The facility houses 15 Full Flight Simulators with ancillary accommodation including computer rooms, briefing rooms, hydraulic rooms, crew lounges, hospitality areas and 27 training Classrooms.

Training is provided for corporate and regional, fixed and rotary wing aircraft such as Hawker, Gulfstream, Cessna, Bombardier and Sikorsky.

The design of the building follows FlightSafety International's corporate philosophy. Construction techniques include pre-cast insulated concrete sandwich panels which whilst being inherently robust also deal with acoustic attenuation on a busy airport site.

Client

FlightSafety International

Floor Area

8250sq. m approx

Construction Period

46 weeks

Construction Cost

£ 7.5 million

Project Team

Architect: etc Design Ltd, Structural Engineer: ASC Ltd, Client Representatives
