Project Description

This project consists of the redevelopment of an existing surface level car park to provide multi storey parking, retail units and residential apartments in the centre of Kidderminster.

The car park design utilises the VCM system to provide 424 parking bays with 3 retail units at ground floor level and 17no. apartments at ground, first and second floor levels.

The design incorporates facilities for disabled, parent and toddlers and bikes. The car park is designed to Park Mark safer parking standards including CCTV linked to the district wide Local Authority system.

The scheme includes a new pedestrian bridge over the River Stour with enhancements to the river frontage including pedestrian and cycle routes
